

SUSTAINABILITY POLICY

EFTCG San. A.Ş. believes, to be aware of social, environmental and economic impacts, encouraging two way dialogue with our stakeholders in all our activities and having an ethical and transparent management style is a mandatory part of our company culture.

With this purpose,

- ★ We will respect to human rights and ethical values, we will be against any type of discrimination, we will have a business understanding which encourages equal opportunity,
- ★ We will target to prevent environmental pollution in the source, we will continuously improve our environmental performance and make efforts to reduce our wastes and carbon footprint,
- ★ We will improve and maintain the sustainability of our existing environmental management system,
- ★ We will reuse our wastes whenever it is possible,
- ★ We will improve and maintain the sustainability of our existing occupational health and safety management system,
- ★ Within our activities we will effectively protect our stakeholders from hazards and maintain their health and safety,
- ★ Comply with all relevant legislations,
- ★ We will make community investments to create community awareness at the subjects of health, education and environment.
- ★ We will be active at finding solutions to the problems of the community,
- ★ We will implement a sustainable supply chain to achieve mutual benefit with the firms in our supply chain.

EFTCG San. A.Ş. in the light of this sustainable reinforced steel production and service policy, commits to work for sustainable development and for a livable world.
